JUAN SEBASTIÁN FLÓREZ JIMÉNEZ

jsflorezj@gmail.com | personal site | Juan Flórez | juancitotrucupey | trucupey

Software Engineer specializing in MLOps, DevOps, and AI Engineering. I design, deploy, and maintain scalable AI applications using distributed computing pipelines in cloud-native environments.

EXPERIENCE

Senior AI Engineer

Mas Global Consulting May 2026 – Present

- Architect multi-agent AI systems where autonomous models collaborate and reason to solve intricate, multi-step business problems.
- Design and maintain robust CI/CD pipelines to ensure seamless, scalable cloud deployments of machine learning applications from development through to production.
- Implement intelligent model routing strategies that dynamically direct incoming tasks to the most capable or cost-effective model based on the specific query.

Senior MLOps/Platform Architect

Traffic Tech August 2025 – April 2026

- Designed and implemented a scalable and fault-tolerant backend for running AI agents using Kubernetes, Azure cloud-native solutions, Temporal.io and IaC tools like Terraform.
- Set the guidelines for the development of Python packages and the proper implementation of CI/CD pipelines using GitHub Actions.
- Designed AI-native automations for a CRM and a TMS using Python and TypeScript.
- Set up an observability pipeline for AI agents based on Langfuse.
- Deployed inference pipelines using vLLM with Ray/KServe on NVIDIA GPUs.
- Set up AI model serving and training in a hybrid cloud (Azure + self-hosted data center).

ML Engineer/MLOps

Lyric Tech Jan 2025 – August 2025

- Designed and deployed distributed training/inference pipelines on Kubernetes with Ray.
- Set guidelines for good versioning practices through containerization, versioned envs and managed container registries via GitHub Actions and Argo Workflows.
- Maintained Python ML libraries, promoted good coding practices and implemented observability pipelines with Sentry.
- Implemented training and evaluation pipelines with MLflow for time-series models in logistics.

ML Engineer/MLOps

Reflejos Dec 2024 – Mar 2025

- Used SOTA diffusion models for conditioned video-to-video generation.
- Developed multi-node ComfyUI workflows for creating visual effects for video.

SKILLS

Python | TypeScript | Bash | SQL | C++ | CUDA

Claude Code | Codex | OpenClaw

Azure | AKS | Container Apps | AWS | EC2 | S3 | GCP | GKE | DigitalOcean | MongoDB Atlas | GitHub Actions

Docker | Ray | Airflow | Kubernetes | Temporal | Kafka | Flink

PyTorch | TensorFlow | LangChain | Tesseract | Hugging Face | Langfuse

MongoDB | SQL Server | PostgreSQL | SQLite | Qdrant | Dremio | Iceberg

Scrum | Kanban

Git | pdb | gdb | pytest | pyright | Ruff | Selenium | FastAPI | gRPC | cProfile | nvprof

LANGUAGES

English | C1 | Spanish | C2 | Russian | A1

EDUCATION

M.Sc. in Mathematics

Universidad Nacional de Colombia Nov 2024

Thesis on mathematical methods for the analysis of solid state physics

B.Sc. in Physics

Universidad Nacional de Colombia Jun 2019

Thesis on numerical simulation of traffic in Bogotá

- Configured cloud instances with NVIDIA GPUs to run open-source SOTA diffusion models written in PyTorch.

ML Engineer/MLOps

Zapata AI Feb 2024 – Oct 2024

- Built distributed training and inference pipelines based on Ray + Kubernetes with GPU/JIT (PyTorch/TF) optimizations.
- Developed and deployed generative time series models (GANs, VAEs, diffusion, flows) as REST API endpoints.
- Owned MLOps: CI/CD (GitHub Actions), evaluation/benchmarking, and scalable hyperparameter tuning.

Software Engineer

Zapata AI Jun 2022 – Dec 2022

- Built Ray + Kubernetes pipelines on AWS for scalable training.
- Designed workflow orchestrator APIs and observability to align AI developers' needs with MLOps infrastructure.
- Co-developed and optimized ML libraries (e.g., QEC search), delivering 50× speedups via JIT + distributed computing.

ML Engineer/MLOps

Human Brain Technologies S.A.S. Feb 2021 – Jun 2023

- Designed and deployed RAG systems.
- Built end-to-end legal-doc ingestion: web scraping to document DBs, information extraction, and versioning of data.
- Authored NLP/epidemics research.

ML Engineer

Contraloría General de la República Oct 2021 – Mar 2022

- Orchestrated, scaled and monitored a 100+ site/day news-ingestion pipeline delivering data to SQL databases.
- Built and deployed NER pipelines to catalogue news and 5k+ public contracts.
- Engineered distributed relevance search to match news–contracts and auto-flag violations.

Data Science Instructor

Pontificia Universidad Javeriana Sep 2023 – Nov 2023

- Provided real-world examples of applications of Machine Learning techniques with hands-on exercises on Kaggle datasets.
- Provided guidelines on the software development skills necessary to work in a fast-paced cross-disciplinary team.
- Coached cross-functional teams on MLOps/dev practices and distributed tools for scalable AI.

EXTRACURRICULARS

Founder

Hubrain Jan 2021 – Present

Group of passionate AI practitioners who love open-source software and sharing knowledge.

Co-organizer

AI seminar, code May 2020 – Dec 2020

Co-organizer

NLP seminar, code May 2020 – Dec 2020
